|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ATM                     | A banking device for automatic transactions with customers, performing customer identification through ATM cards, helping customers check accounts, withdraw cash, transfer money and pay for goods and services.                                                                                                                                                                                                                                                                                                   |
| Bank Card               | A means of payment issued by the card issuer to perform card transactions according to terms and conditions agreed upon by the parties (user, merchant, bank etc.)                                                                                                                                                                                                                                                                                                                                                  |
| POS                     | A system to support sales at retail points in the matter of payment via card. Each POS always has a system or tool to record transactions to reflect the amount of cash and goods coming in and out in a certain period of time.                                                                                                                                                                                                                                                                                    |
| Internet banking        | Banking services and intermediary payment services provided by units through the Internet                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Mobile banking          | A payment solution that allows customers to conduct financial transactions through mobile devices                                                                                                                                                                                                                                                                                                                                                                                                                   |
| QR code payment         | QR code payment is a contactless payment method where payment is performed by scanning a QR code from a mobile app                                                                                                                                                                                                                                                                                                                                                                                                  |
| E-wallet                | A means of payment used in electronic transactions provided by banks, foreign banks' branches, and e-wallets providers. E-wallets are created through electronic means, on information carriers (such as electronic chips, mobile phone sims, computers...), or cash to the payment guarantee account for the provision of e-wallets of the e-wallet supplier in the ratio 1:1. allowing to store a monetary value guaranteed by the deposit value is equivalent to the amount transferred from the payment account |
| Mobile Money            | Mobile Money is a separate e-wallet, using on mobile phone or the similar devices. Its essence is the conversion of cash into electronic money in a 1:1 ratio. In constrast to traditional e-wallet which links with bank account, Mobile Money accounts are identified through the customer's own phone number                                                                                                                                                                                                     |

# Development History of Current Payment System

In 2013-2021 period, high value transactions had nearly tripled, while low value transactions have been processed much more in NAPAS than in IBPS's LVSS. The evolution of current systems is thoughtfully planned, introducing global standard features

# Situation of Payment Channel

Among modern channels, mobile banking has the largest number of transactions and value. In addition, the increasing coverage of payment channels has shown that the accessibility to financial services in Vietnam has improved

# Situation of Payment Channel (2)

Internet banking is preferred for large value transactions, while QR code and Mobile money are preferred for small transaction value. Most of goods and services, as well as public services, have already promoted digital payment

- Approval of personal data protection decree (Gov: Resolution 38/NQ-CP)

- Vietnam Blockchain Association is allowed to establish (MOA, Decision No. 343/QĐ-BNV)

- Protection of personal data (Gov Decree)
- Electronic identification and authentication (Gov Decree)

# Financial Inclusion – Goal, Achievement to 2021 and Plan to 2025

The DX plan in Financial Inclusion is specifically issued with four goal groups on basic access, product & services, finance infrastructure and legal framework. By the end of 2021, After nearly 2 years of implementation, there have been some improvements recorded, but to achieve the targets of 2025 still need to continue to strive

| GOALS                                                                                 | ACTIONS                                                                                                                                                                                                                                                                                                                                      | ACHIEVEMENT (2021)                                                                                                                                                                                                                                        |                                                                                                                 | TARGET TO 2025                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

# Strategy for DX in banking industry to 2025, orientation to 2030

Objectives and tasks of DX of the Banking industry along with a number of specific targets for SBV and Credit institutions up to 2025 and 2030 are specified (1) SBV needs to apply technology to build payment system and build e-government, (2) Credits institutions need to promote cashless payments and increase the proportion of non-credit services with digital tools

| TARGET                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                        |                                          |      |      |

# Strategy for DX in banking industry to 2025, orientation to 2030 (2)

The whole industry has important common tasks in terms of safety, human resource development, data utilization, and awareness raising, SBV has the task of perfecting the management system and supporting the construction of e-government, Credits institutions has the task of expanding information networks and banking services, technology adoption and fintech cooperation

## Chapter 1: Vietnam situation about digital currency and related socio-economic issues

- Vietnam payment ecosystem
- Vietnam National Strategy and Legal framework
- **Cooperation status of donors**

# Review the status of cooperation

Collaborative activities are divided into 5 main groups, this research will focus on Gov-Gov and Int' donor-Gov groups

Main focus of this research

| Cooperation type<br>(Donor – Receiver) |                               | Form of cooperation                                                                                                   | Purpose of donor for the cooperation                                                                                                                                                                                                               |
|----------------------------------------|-------------------------------|-----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (1) Gov - Gov                          | (2) Int' donor – Gov          | Technical or Financial assistance program for the development of payment system or financial inclusion                | <ul style="list-style-type: none"><li>• Improve management capacity of state agencies</li><li>• Macroeconomic solutions such as monetary policy operability</li><li>• Solve socio-economic problems (poverty reduction, support SMEs...)</li></ul> |
|                                        |                               |                                                                                                                       |                                                                                                                                                                                                                                                    |
| (3) Private companies – Gov            |                               | Technical support for payment system, non cash payment (Private companies are mostly fintech or financial institutes) | <ul style="list-style-type: none"><li>• Introduce the new technology to Vietnam (directly to Government or indirectly to the Private sector through the Government's support)</li><li>• Create the business environment for innovation</li></ul>   |
| (4) Gov – Private sector               | (5) Int' Org – Private Sector | Technical or Financial support                                                                                        | <ul style="list-style-type: none"><li>• Support the development of fintech or financial products/services</li><li>• Utilize the network between Private Sector and VN government for future cooperation</li></ul>                                  |
|                                        |                               |                                                                                                                       |                                                                                                                                                                                                                                                    |

# International organizations – Focus areas related to finance

ADB, WorldBank and IMF, as well-known donors in finance sector in Vietnam, are covering many supporting themes, remaining some advisable themes for JICA in the future

| ORG        | Current focus related to finance in VN                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Expect toward JICA*                                                                                                                             |

# Some main projects of Foreign country Government

There aren't many bilateral initiatives among governments of countries that have been studied, with the majority coming from the USA, Australia, and Japan

| ORG             | Financial Inclusion                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Financial Stabilities                                                                                  | Macroeconomics                                                                                                                                             |
